

JUNE 2022 HONORED ANGEL

Baby Steele

6.23.2021

We were pregnant with Steele in February 2021. Fairly soon, we started to have complications with bleeding, sub-chronic hematoma, and incompetent cervix. I was hospitalized three times and underwent a surgery called a Transvaginal Cerclage in hopes of giving Steele a fighting chance. Unfortunately, the transvaginal cerclage failed causing infection to set in and causing chorioamniocentesis. Steele was born at UVA on 6-23-21 weighing a big beautiful 9.5 oz at 20 weeks.
